Hydrogen

Sustainable Freight

It's not easy to be a clean freight pioneer.

Looking at what others have done in sustainable freight industry can provide ideas for positive change, guide you safely past any pitfalls and provide reassurance that what is being planned can be achieved in hydrogen fueled freight sector.

Plenty of Transport companies, big and small, locally and International, have cut costs, improved productivity and lowered environmental impacts simultaneously. Learning from their successes is smart business.

Secure Supplies provides Sustainable freight and logistics fueling solutions. So no matter what your consuming device, a truck, a forklift, a side loader or a crane we have the Fueling Hub Solution to go 100% green and sustainable.

Global Distribution

Quality Management System:

ISO9001-2015
GJB9001B-2009 (MIL)

Secure Supplies Product/s Meet Customers Demands.

Bigger is Better

Globally we are seeing a trend towards bigger aircraft, bigger trains, bigger ships and bigger trucks. As freight transport units get bigger the transport costs per tonne of freight reduces. Read more...

Profile of Australia's Trucking Fleet: Age and Emissions

A substantial number of heavy vehicle trucks throughout Australia were purchased before more stringent emission controls were placed on new trucks (pre-1996). The issue today is that these vehicles still make up a sizeable percentage of trucks in operation today and are responsible for more than their fair share of the road freight industry's noxious gases.

The document covers the age and emissions of trucks in operation today but also suggests a government incentive program to address this growing issue. Read more ...
